## CAREER SUMMARY

Motivated B.SC graduate in Computer Science with internship experience in data analytics and practical exposure to Python, SQL, Advanced Excel and Power BI. Skilled in data cleaning, exploratory data analysis, dashboard development and reporting. Experienced in transforming raw datasets into actionable insights through interactive visualizations and BI reporting. Seeking an entry-level Data Analyst role to apply analytical and problem-solving abilities to support data-driven decision-making and contribute to organizational growth.

## SKILLS

- Power BI
- SQL
- Streamlit
- Dashboard Development
- Business Intelligence
- Excel
- Pandas
- Plotly
- Data Visualization
- EDA
- Python
- NumPy
- Data Analysis
- KPI Reporting
- GitHub

## CERTIFICATION

- Data Analytics Certification - Innovative Academy for IT Solutions
- Excel for Analytics – Hands-on Certification
- Python for Data Analysis – Training Program

## INTERNSHIPS

### DATA ANALYTICS INTERN

#### Innovative Academy for IT Solutions

- Analyzed and transformed real-time datasets using **Python, Pandas, SQL, Advanced Excel, and Power BI** to prepare reliable data for business analysis.
- Cleaned and validated datasets by handling **missing values, duplicates, inconsistent data, and data types**, improving data quality for reporting and visualization.
- Developed **SQL queries** to extract, filter, aggregate, and analyze business data for identifying trends and performance insights.
- Performed **Exploratory Data Analysis (EDA)** using Python and Pandas to identify patterns, trends, and key business insights from raw datasets.
- Built interactive **Power BI dashboards and KPI reports** to visualize business performance and support data-driven decision-making.
- Applied data transformation and reporting techniques to convert **raw datasets into actionable business insights** for analysis and presentation.
- Created end-to-end analytics workflows covering **data extraction → data cleaning → transformation → analysis → visualization → reporting**.

## PROJECTS

### Amazon Sales Dashboard

Tools: Python, Pandas, SQL, Excel, Streamlit, Plotly

- Built an interactive Amazon Sales Dashboard to analyze sales performance, customer behavior, product performance, and return rates.
- Cleaned and transformed raw sales data using Python, Pandas, and Excel, including handling missing values, duplicates, and incorrect data types.
- Used SQL queries to extract, filter, aggregate, and analyze sales data for reporting and business analysis.
- Created KPI reports to track revenue, orders, sales performance, and top-selling product categories.
- Performed Exploratory Data Analysis (EDA) to identify sales trends, product performance, and customer behavior patterns.
- Developed interactive visualizations using Plotly and Streamlit to present business insights in an easy-to-understand format.
- Created an end-to-end data analytics workflow:  
**Data Extraction → Data Cleaning → Data Transformation → Analysis → Visualization → Dashboard.**
- Provided actionable business insights to help understand sales trends, product performance, and return patterns.
